

Instructions for Usage

BarangayLink is a web-based barangay management system that digitizes resident records, clearance and permit processing, blotter management, activity announcements, and reports. It helps improve efficiency, transparency, and accountability in barangay operations.

System Requirements

- XAMPP (Apache and MySQL)
- PHP 8.x or compatible version
- Modern web browser (Google Chrome, Microsoft Edge, or Firefox)

Installation Steps

1. Download the BarangayLink project folder from the Google Drive link.
2. Extract the ZIP file.
3. Download XAMPP from the official website:
<https://www.apachefriends.org/>
4. Install XAMPP on your computer.
5. Copy the project folder to: (C:\xampp\htdocs\)
6. Open XAMPP Control Panel.
7. Start Apache and MySQL.
8. Open phpMyAdmin : <http://localhost/phpmyadmin>
9. Create a new database (bmis)
10. Import the provided .sql file into the database.
11. Open your browser and visit: <http://localhost/BrgyLink>
12. Log in using the provided user accounts.

Login Credentials

Administrator

Email: barangayeastmodernsite@gmail.com

Password: EMS2026

Resident

Register a new account or use the provided resident credentials.

Email: abc@gmail.com

Password: 1234567890

Resident

- Register or log in.
- Submit clearance or permit requests.
- Track the status of requests via Email
- View barangay announcements and activities.

Administrator

- Manage resident records and user accounts.
- Process, approve, or reject clearance and permit requests.
- Record, update, and monitor blotter reports.
- Create and manage barangay activities and announcements.
- Generate official documents such as barangay clearances and permits.
- View reports and data analytics to support decision-making.
- Maintain and update system records to ensure accurate and efficient barangay operations.
